Project Development Phase
Performance Test

Date	21 October 2026
Team ID	EN25CS3010849
Project Name	**Global Olympic Sports Performance Analysis**
Maximum Marks	

Project Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Screenshot / Values
1.	Data Rendered	Tables loaded: athlete.csv,medals_results.csv,alltime_country_ranking.csv and games_summary.csv Records count: 135,571 records(in athlete) File size : 45MB to 50MB
2.	Data Preprocessing	Missing Values Handled: Checked all columns in athlete.csv and medals_results.csv for null values; handled missing numerical and categorical data appropriately. Duplicate removal: Scanned datasets and removed duplicate rows to maintain data cleanliness. Standardization: Standardized text cases and trimmed extra whitespaces across athlete names, countries and sports disiciplines.
3.	Utilization of Filters	Country / NOC filter (to view specific nation statistics) Medal type filter (Gold, Silver, Bronze) Sport/Discipline Filter (to filter performance by specific olympic sports) Performance: interactive filters execute instantly with smooth data transition and zero rendering lag.
4.	Calculation fields Used	Total Medals Calculation: Total Medals = Gold + Silver + Bronze (calculated to get the aggregate medal tally for each country/athlete). Medal Performance Ratio: Created a calculated ratio field to measure the success rate of athletes based on total events participated versus medals won. Athlete categorization: created conditional grouping fields to categorize athlete based on their event types and performance brackets.
5.	Dashboard design	No of Visualizations / Graphs – 6 Visualizations

6	Story Design	No of Visualizations / Graphs – 4 visualizations
