Project Demo Planning

Date	21 October 2026
Team ID	EN25CS3010849
Project Name	Global Olympic Sports Performance Analysis
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Overview of the project objective, background, and challenges in analyzing fragmented raw Olympic CSV datasets.	2mins	Shamaila Irfan
2	Solution Architecture & Stack	Brief explanation of the technical stack (Python, Pandas, SQL, Tableau / Power BI) and automated data cleaning pipeline.	2mins	Shamaila Irfan
3	Live Feature Demonstration	Live walkthrough of interactive dashboards, dynamic multi-filters (Year, Sport, Country), and KPI medal metrics.	5 mins	Shamaila Irfan
4	Athlete Trait & Trend Analysis	Showcasing visual scatter plots and charts correlating athlete physical attributes (Height, Weight, Age) with medal success.	3mins	Shamaila Irfan
5	Results & Future Scope	Summarizing key analytical insights derived from ~270k+ records and discussing future enhancements (live API integrations).	2mins	Shamaila Irfan
6	Q&A Session	Addressing evaluator queries regarding dataset processing, dashboard responsiveness, and methodology.	1min	Shamaila Irfan

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Start with a strong hook about the difficulty of managing raw Olympic data (medals.csv, athlete_events.csv) manually and state the project goal clearly.
2	Solution Overview	Briefly explain how Python/SQL scripts clean and consolidate raw records before feeding them into Tableau / Power BI dashboards.
3	Live Feature Demonstration	Perform a live click-through of the dashboard filters, showing how instantly KPI cards and country medal tallies update.
4	Q&A Session	Keep the GitHub repository and Tableau Public dashboard open in the browser for quick reference if evaluators ask technical questions.
